

Plastic Resources Inc.

Injection Molding • Blow Molding • Rotational Molding • Extrusion • Gas Assist • Structural Foam

A single source for multiple processes and technologies

Primary Processes

- Injection Molding
- Cellular Vinyl Extrusion
- Structural Web (Gas Assist)
- Structural Foam
- Rigid Extrusion
- Rotational Molding
- Blow Molding
- Multi-Durometer Extrusion
- Thermoforming

Other Processes and Services

- SMC/LPMC
- RTM
- Hand Lay-Up/Spray-Up
- Stretch Blow Molding
- Cast Urethane
- Pultrusion
- Cast/Compression Molded Urethane
- Dual Color/Material Molding
- Insert Molding

Plastic Resources Inc. is your single source for multiple processes and technologies, backed by engineers who represent leading custom molders and extruders for all major plastic processes. We work with you on new programs to help optimize your design and select the best process or integration of multiple technologies. We also provide solutions for existing programs by considering new production methods or relocating existing tooling for improvements in production, supply and pricing. With over twenty years of experience we are proud to offer the highest level of service, quality and technology needed to meet today's complex molding requirements.
